

Table of Contents

	Page
Chapter 1. Introduction	1-1
Introduction	1-1
Study Purpose and Objectives	1-1
Study Area and Important River Subreaches	1-2
Related Studies In Progress	1-2
Background on the San Joaquin River	1-4
Climate and Surface Hydrology	1-4
Major Tributaries	1-5
Geology, Geomorphology, and Soils	1-5
Riparian Vegetation	1-7
Land Use Along the River	1-7
Dams and Reservoirs	1-7
Flood Control Projects	1-8
Prior Investigations and Studies	1-10
Chapter 2. Study Methods and Approach	2-1
Field Surveys	2-1
Aerial Reconnaissance Flights	2-1
Ground Level Surveys	2-1
Cross-Section Surveys	2-2
Analytical Methods	2-3
Hydrology	2-3
Hydraulics	2-3
Geomorphology and Sedimentology	2-5
Characteristics of Riparian Vegetation	2-6
Vegetation and Sedimentation Processes	2-6
Vegetation and channel Stability	2-6
Evaluation of Vegetation Condition and Trends	2-7
Sources of Information	2-7
Analytical Assumptions: Field Indicators	2-8
Analytical Assumptions: Data on Physical Environment	2-8
Chapter 3. Hydrology and Hydraulic Conditions	3-1
Hydrology	3-1
Hydraulics	3-3
Chapter 4. Sediment Transport and Geomorphic Conditions	4-1
Study Area Geomorphology	4-1
Subreach 5	4-1

Subreach 4B	4-2
Subreach 4A	4-2
Subreach 3	4-2
Subreach 2	4-3
Subreach 1B	4-3
Subreach 1A	4-4
1914 Channel Characteristics	4-4
Valley Slope and Sinuosity	4-4
Channel Width and Depth	4-5
Channel Width and Depth Changes Between 1914 and 1998.	4-6
Subreach 5	4-6
Subreach 4B	4-6
Subreach 4A	4-7
Subreach 3	4-7
Subreach 2	4-7
Subreach 1B	4-7
Subreach 1A	4-7
Vertical Changes in River Channel Between 1914 and 1998	4-8
Lateral Changes in River Channel Between 1914 and 1998	4-9
Erosion and Sedimentation	4-9
Chapter 5. Vegetation Condition and Trends	5-1
Overview of Probable Historical Changes in Distribution of vegetation	5-1
Subreach 1	5-1
Subreach 2	5-1
Subreach 3	5-2
Subreach 4A	5-2
Subreach 4B and 5	5-2
Current Pattern of Riparian Vegetation	5-3
Forest Nodes and Connected Habitats	5-3
Recruitment and Colonization	5-4
Apparent Major Limiting Factors	5-5
Channel Hydraulics and Substrate Stability (Bed Scour)	5-5
Frequency of Floodplain Inundation	5-6
Intermittent Flow	5-7
Depth to Groundwater	5-8
Salinity and Soil Suitability	5-8
In-Channel Sand and Gravel Mining	5-10
Agricultural Conversion of Low Floodplains	5-10
Other Local Influences on Vegetation Pattern	5-11
Floodway Management	5-11
Competition with Exotic Species	5-11
Herbivory	5-12
Limited Seed Sources and Dispersal	5-13
Probable Future Condition of Riparian Habitat	5-13
Chapter 6. Conclusions and Recommendations	6-1
Introduction	6-1
Geologic and Geomorphic Setting and Subreaches of Study Area	6-1

Major Influences on the San Joaquin River	6-2
Effects of Major Influences	6-3
Geology and Geomorphology	6-3
Friant and Water Storage Projects	6-4
Mendota Water Importation	6-5
Subsidence	6-5
Flood Control Project	6-6
Sand and Gravel Mining	6-8
Study Area Vegetation Conditions and Trends	6-8
Reach-Specific Vegetation Conditions and Trends	6-10
Subreach 1A and 1B: Friant Dam to Gravelly Ford	6-10
Subreach 2: Gravelly Ford to Mendota Pool	6-11
Subreach 3: Mendota Pool to Sack Dam	6-12
Subreach 4A: Sack Dam to Sand Slough Control Structure	6-13
Subreach 4B: Sand Slough Control Structure to Bear Creek	6-14
Subreach 5: Bear Creek to Merced River	6-15
Recommendations to Improve Riparian Habitat and Channel Stability	6-15
Conservation of Existing Resources	6-16
Management of the River Corridor	6-18
Concepts for Restoration of Suitable Sites	6-22
Site-Specific Restoration Constraints	6-27
Constraints Affecting Restoration Project Sites	6-27
Soil Suitability Criteria for Selection of Project Sites and Measures	6-27
Chapter 7. Future Studies and Data Needs	7-1
Physical Processes Data Needs	7-1
Improved Gage Data	7-1
Additional Stage Calibration Data	7-1
Integrated, Continuous Hydraulic Model	7-1
Riparian Habitat Data Needs	7-3
Recent Recruitment and Regeneration	7-3
Relation of Vegetation Type to River Stage	7-3
Corridor Map of Low Floodplains	7-4
Age Classes of Mature Riparian Habitat	7-4
Salinity Concentrations on Surface Soils	7-5
River Corridor Profile of Shallow Groundwater	7-5
Chapter 8. Citations	8-1
Printed References	8-1
Personal Communications	8-3
